

**Deluxe Battery Bag:** This was specifically designed for carrying additional batteries etc. With two external pockets for charging accessories and leads. On the top of the bag there is a large pocket to accept the transmitter and echo handset. The bag is fitted with two carry handles.

**GPS Navigator Custom Carry Bag:** This custom carry bag was specifically designed to carry the GPS Navigator system.

It is waterproof and foam lined. There is an internal zipped pocket to store your instructions and has a carry handle. (GPS System not included)

**Protection Mat:** This protection mat is manufactured from waterproof material and is padded. It has "D" rings at each corner to allow it to be secured to the bank.

Allowing you to have a dedicated area where the boat can be left, when not in use, without being damaged on the bottom.

It folds into three and can be packed in the supplied bag.

**Waterproof Stretch Cover:** Available for all models this cover allows you to leave the boat outside the bivvy and it to be protected from either the early morning and evening dampness and rain.

**Transmitter Rain Pouch:** A custom designed cover to protect the transmitter from the rain. It allows you to use the transmitter during damp / wet conditions. It comes complete with detachable neck strap.

**PVA Enclosure:** The PVA enclosures have been designed as a hollow, one ended, box that fits just inside the top of the hopper on all Microcats and Technicat (two side by side) and are held in position by self adhesive strips. The purpose of the enclosure is to position it just inside the hopper according to the rig length so that you can push inside a PVA bag to keep it covered from the rain and or any dampness.
