

**Transmitter Battery Pack:** A spare battery pack for the "Microcat MkI, MkII" & Technicat MkI" transmitter.

**Baitdroppers:** Designed primarily for use with the "Baitboat" to enhance 100% of particle deployment.

The Baitdroppers perform on just the same principle as a bait rocket and can carry your rig as well as particles and after they have been despatched the Baitdroppers are towed back behind the boat.

**Livebait Hopper Covers:** These covers are only suitable for all "Microcats MkI, MkII, MkIII & "HD" and fit tightly into the hoppers to curtail any movement of bait, they can also be used in wet conditions to keep the bait dry, also used to cover your bait and keep it away from any wildlife.

**Livebait Hopper Covers:** These covers are only suitable for the "Baitboat" and are fastened into position using self adhesive strips covering both hoppers to stop any movement of the bait. They can also be used as described in the livebait hopper covers above.

**Livebait Hopper Cover:** This hopper cover is only suitable for all "Technicats" and fastened into position by self adhesive and can be used as described above.

**Neck Strap:** A quick release neck strap to support the transmitter during use. This is to leave a hand free for holding and echo receiver or otherwise.

**Stern Light:** The light can be fitted to the stern of any of the boats in conjunction with the spotlight to help navigation at night. With new batteries it will emit a very bright light for 50 hours or 100 hours if set in the "blink" mode. It is attached to the boat by means of a clip and a self adhesive strip.

**Spotlight:** A powerful, removable torch which has an independent power supply that can be used with any of the boats for additional lighting at night.

**Decal Sheets:** A decal sheet gives you the chance to personalise your boat to your own taste. Each sheet is self adhesive, fluorescent and waterproof and can be cut to the desired shapes. A sheet is supplied A4 size.

**12 volt DC - DC Converter:** This converter can be plugged into a cigarette lighter socket and reduce the voltage as required. The options are 12 volts down to 1.5 - 3.0 - 4.5 - 6.0 - 7.5 - 9.0 with six choices of jack plug.
